Current School: _____

Mother's Name: _____ Father's Name: _____

Sibling's name(s) and age(s): _____

Favorite Hobbies or Interests: _____

Who may we thank for referring your child to our office? _____

Please take a few moments to read the following information as it will aid you as you complete this form.

The human body is designed to be healthy. The primary system in the body that coordinates health is the nervous system. The healthy function of every cell, every system and every organ is dependent upon the integrity of the nervous system. The bones of the skull and vertebrae of the spine house and protect the central nervous system.

From the birth process until the present, events have occurred in your child's life that may have caused interference and damage to this delicate system. Physical, emotional and chemical stresses common to our contemporary lifestyles can result in less than ideal spinal health. This interference is called the Vertebral Subluxation Complex (VSC).

We are becoming more aware of how current technological lifestyles and practices expose our children's nervous systems to continuous stresses. These result in Vertebral Subluxations.

Current scientific research shows the direct relationship between the function of the nervous system and the immune system. The integrity of the nervous system is therefore imperative to a healthy immune system in your growing child.

Today, your child has the opportunity to have a spinal analysis by a Doctor of Chiropractic, the only health care provider qualified to locate, analyze and correct the Vertebral Subluxation Complex. Correction of the Subluxation with the Chiropractic Adjustment is the beginning of greater health and well-being for your child.

Completing this form in its entirety will help reveal the causes of Vertebral Subluxation that interfere with the optimal function of your child's nervous system and therefore impair your child's inborn health and well-being.

**Thank you for choosing Wellness for You NOW Chiropractic!
We know there is no more precious gift than the health and happiness of your child.**

REASON FOR TODAY'S VISIT

Does your child complain of pain or discomfort? Yes No If yes, when did this occur? _____

Was the onset: ___ Sudden ___ Gradual Is the problem: ___ Constant ___ Intermittent
